15-26 September 2025

About NIDM

The National Institute of Disaster Management (NIDM) was constituted under an Act of Parliament with a vision to play the role of a premier institute for capacity development in India and the region. Under the Disaster Management Act 2005, NIDM has been assigned nodal responsibilities for human resource development, capacity building, training, research, documentation and policy advocacy in the field of disaster management. Inspired by the Hon'ble PM 10-point agenda on DRR, the Institute is committed to make all out efforts towards achieving aim of Disaster Resilient by building the capacity at all levels for disaster prevention and preparedness.

NIDM provides Capacity Building support to various National and State level agencies in the field of Disaster Management & Disaster Risk Reduction. The Institute's vision is to create a Disaster Resilient India by building the capacity at all levels for disaster prevention and preparedness.

About Program

NIDM is organizing a two-week Comprehensive Training Course on Disaster Risk Management for international participants from 15th to 26th September 2025 at its Rohini campus, New Delhi. This flagship program, held under the Indian Technical and Economic Cooperation (ITEC) initiative of the Ministry of External Affairs, aims to strengthen the capacity of global participants in disaster preparedness, mitigation, response, and recovery through a blend of expert lectures, experiential learning, field visits, and technology-enabled training. With a focus on India's advanced institutional mechanisms, policy frameworks, and innovative practices aligned with global standards such as the Sendai Framework and SDGs, the course offers a unique platform for knowledge exchange, skill-building, and cross-border collaboration in disaster risk reduction.

Key Objectives

- Develop a comprehensive understanding of both the foundational principles and complex dimensions of disaster risk management.
- Showcase India's advancements in institutional mechanisms and technological innovations in Disaster Risk Management (DRM).
- Facilitate cross-country knowledge exchange on effective risk governance, financial mechanisms, and resilience-building strategies.
- Strengthen awareness of global hazard profiles, vulnerabilities, and associated risks.
- Deepen familiarity with disaster management frameworks at both national and international levels.
- Support the integration of Disaster Risk Reduction (DRR) into development planning and sectoral policy formulation.
- Provide insights into the 'Build Back Better' approach and introduce concepts of financial risk management.
